PROFESSIONAL SUMMARY

VFX Digital Compositor with 2 years of professional experience in feature film and episodic productions. Strong foundation in Nuke-based compositing, including roto and prep, chroma keying, and CG/FX integration, delivering production-ready shots under supervision and tight deadlines. Familiar with basic Python scripting in Nuke and the use of generative AI tools to support compositing workflows. Credits include *Society of the Snow* (2023) and *Leave the World Behind* (2023).

WORK EXPERIENCE

VFX Digital Compositor

LaLivingston — Madrid, Spain | Jun 2025 – Present

- Collaborated within a small VFX team on films, TV shows, short films, and museum exhibition projects.
- Composited chroma key and full VFX shots, focusing on element integration and final image quality.
- Composited CG-heavy shots, creating atmospherics such as smoke, particles, and volumetric lighting, using Blender to support volumetric setups from existing scene assets.
- Utilized generative AI tools as part of the compositing workflow to support specific shot requirements.

Selected Credits: *La Coleccionista* (2025), *La Ruta Vol. 2: Ibiza* (2025), *That Night* (2026)

VFX Junior Compositor & AI Artist

EI Ranchito VFX — Madrid, Spain | Oct 2022 – Oct 2023

- Started as a compositing intern and progressed to a full-time junior compositor role, contributing to feature films, commercials, and music video productions.
- Specialized in roto and prep work in Nuke across multiple productions.
- Composited shots under senior supervision, integrating CG elements and atmospheric effects.
- Assisted senior compositors on feature film sequences, providing roto and paint support for final shots.
- Contributed to machine learning workflows in production by preparing image datasets and supporting compositing tasks through Python scripting in Nuke.

Selected Credits: *Society of the Snow* (2023), *Leave the World Behind* (2023)

SKILLS & SOFTWARE

- Compositing: Nuke, Roto, Prep, Chroma keying, CG & FX Integration, 2D/3D Tracking, Color balancing
- Pipeline & Production: ShotGrid/Shotgun, ftrack
- CG & Support Tools: Blender, Autodesk Maya
- Technical: Python (basic scripting in Nuke), ComfyUI, Generative AI tools for compositing
- Other Tools: Mocha Pro, Adobe Photoshop, Premiere Pro
